Dear Alan,

Re: "ROGER" - Murray Grey Bull

We were just thinking last week that we should write and give you an up date on Rogers's progress at Waterford Park.

Since arriving at Waterford Park and making our farm his home, he has settled in well and is growing into what we think is a most magnificent bull grazing on no less than wonderful pastures. His silver grey coat glistening in the sunshine never ceases to make us marvel.

Even more importantly Alan, our vet came out last in late December 2008 and pregnancy tested all the girls (25) and 100% strike rate! Again great news for us. Now we await the next step.

Not having had a moment since Roger arrived, I thought it also worthwhile, even at this late stage to thank you for all your help in guiding us through the process of choosing Roger, the service you and George offered to get him to Waterford Park and all your excellent advice and follow up service since he arrived.

Well done to you both and look forward to you coming over and having lunch as an excuse for you to see Roger whilst he quietly grazes under the plum trees.

Warm regards

Jenny Harrington
